Adventure Pilot Names New Pilot Advisory Board

McKinney, TX – May 2, 2019 – Adventure Pilot announces the creation of a 10 member Pilot Advisory Board (“PAB”) to help with the development of iFly GPS™ and future aviation applications. The advisory board is comprised of pilots of all levels of experience ranging from newly minted Private Pilots to 20,000+ hour ATPs. The common denominator was a passion for flying and a desire to advance technology solutions in the cockpit.

These pilots bring a wealth of knowledge and real-world experience using Electronic Flight Bag applications in variety of aircraft. Walter Boyd, Adventure Pilot President, noted “We have always listened to the market and our customers with virtually every iFly GPS feature traceable to market or customer demand. The new PAB will take this to the next level by giving us direct, interactive feedback on future features and products. We’re excited to be working with such a great team.”

Vice President of Business Development, Dave St Clair, added, “We have already used our Board to help design and test new features that will be incorporated into iFly GPS over the coming months.”

Adventure Pilot expects creative solutions to emerge from the team that advance the iFly GPS state-of-the-art flight planning and navigation solution while keeping the technology simple and reducing pilot workload.

About Adventure Pilot

Adventure Pilot is the creator of iFly GPS, an industry leading, cost effective Electronic Flight Bag designed for Android, iOS and Windows. iFly GPS offers powerful flight planning and navigation solutions that go far beyond the imagination while keeping the operation simple and intuitive. Adventure Pilot creates affordable solutions meant to inspire, inform and enable a community of passionate pilots to fulfill their desire for aerial adventures.
